

**Mason Public School's
Integrated Pest Management
(IPM)
Annual Notice**

Pesticides may occasionally be used in the school building or grounds. Parents or guardians of students attending that school or day care center will be notified at least 48 hours before a pesticide, other than a bait or gel formulation is used. However, in an emergency, a pesticide may be applied without providing advance notice. Parents or guardians will be promptly notified after the emergency pesticide application. The two methods of notification will be: 1 A posting inside each entrance to that building. 2 A notice posted on the district's website (www.masonk12.net). Those who wish to be notified by U.S. mail may make such request by contacting the principal of that building. The Schools IPM program may be reviewed by contacting the building principal or you may also contact Kevin Doty – Operations Director (517)-676-2484.

PESTICIDE PRIOR NOTIFICATION REQUEST

Parent/Guardian Name: _____

Student's (Child's) Name: _____

Street Address: _____

City: _____ Zip Code: _____
